DRAFT

## NCD EG Work Plan for 2017

(To be discussed and approved at the 12 NCD EG meeting to be held on 30 of November, 2016.  
Moscow, Russian Federation)

**AIM:** to reduce premature mortality from the NCDs through strengthening activity towards the prevention of avoidable causes of the diseases and mortality, contributing to the reduction in prevalence of behavioral risk factors of the NCDs, working toward implementing the NDPHS Strategy 2020.

### **Objectives, planned activity and expected results**

#### **1. Better implementation of Health-in-all Policies at all levels:**

Planned activity:

Projects

Project Idea “Healthification” (proposed by the Healthy Cities Association): country Partners interest and their participation will be discussed

Project Idea “To create a platform for the health literacy promotion among the people with various responsibilities for public health” (proposed by the NCD EG of the Russian Federation): country Partners interest and their participation, opportunities for funding will be discussed

Expected results

Implementation of agreed cost effective evidence-based measures addressing lifestyle-related risk factors and health indicators by creation a platform for the health literacy promotion and increasing knowledge on good health in various group of people.

#### **2. Better comprehensive national health system response to reduce NCDs’ burden:**

Planned activity:

Active discussing and identifying adequate resources (professionals, structures, agencies, funds) within and outside of the health care systems for interagency, cross-sectoral cooperation during each NCD EG meeting

Project

Project Idea “Assessment of NCD and NCD RF screening and follow-up programs in NDPHS Country Partners for selection of the best practices” (Proposed by the NCD EG of the Russian Federation): country Partners interest and their participation, opportunities for funding will be discussed

Expected results

Agreed best practices for comprehensive cost effective response of national health system to reduce NCDs’ burden at regional, national or local level.

#### **3. Strengthened stakeholder involvement in preventing life style related risk factors;**

Planned activity:

Identify stakeholders to be involved in the evidence-based measures toward preventing life style related risk factors.

Define the role and contribution of health professional organizations and private sector (non-state actors) in the monitoring and prevention of NCDs and life style related risk factors.

Expected results

Prepare conclusions and recommendations (Guideline, Report) for Public-Private Partnership and disseminate via the NDPHS website, newsletter and media events to public administration at regional, national or local level.

Increase the State and non-state institutions involvement for implementation of Health- in-all Policies Statement

**4. Collaborations with other NDPHS EGs: obtaining mutual interests, data on financial and personnel resources for operational activities;**

Planned activity:

Discussed and define mutual interested areas for effective preventive measures to reduce NCDs and NCD RFs with other EGs at each meeting of Chairs and ITAs, PACs.

Organization and participation in the Joint meeting with Alcohol and Substance Abuse (ASA) EG in 2017.

Expected results

Obtain mutual interests, data on financial and personnel resources for operational activities, including joint meetings, projects, statements, guidelines, reports, etc.
