

**EG on HIV/AIDS
Fifth Meeting
Paris, France
4-5 October 2006**

Reference	HIV/AIDS 5/6/Info 1
Title	HIV/AIDS EG mandate adopted during the CSR 5
Submitted by	HIV/AIDS EG ITA
Summary / Note	-
Requested action	For reference

Background:

Under the CBSS' Task Force (TF) on Communicable Disease Control, an important part of the structure was the Program Groups. When the TF mandate expired in 2004, there was wide consensus that these groups were valuable and that measures should be taken to use further their expertise and experience.

Over the 3 years of working under the TF initiative, HIV/AIDS/STI working group reviewed more than 55 proposals, 39 of these were approved and implemented in all parts of Northern European Region. The procedures how the working group has reviewed and supported the projects have been simple and allowed rapid implementation. Several international networks on different levels have been created and, what is most important, a spirit of cooperation and partnership has been established. The group was strongly convinced that continuation of the work of the group would help to maintain activities that have been initiated and implemented according to the adopted priorities. The group had expressed that willingness with the letter addressing to ND secretariat. As a result of that HIV/AIDS group was invited to continue under the Partnership umbrella. By decision of ND Partnership ministerial meeting in Tallinn, an expert group in the field of HIV/AIDS was created.

Structure and working principles:

Each partner of ND partnership had appointed, on a voluntarily basis, one national member to the expert group. The persons who are serving in the HIV/AIDS Group are leading experts in the field of HIV/AIDS. The group members will act as the focal point for national inputs from their respective countries to the working process. Group will invite additional experts, observers and guest, to participate in specific meeting, if found appropriate by group.

It is decided to establish a position of International Technical Adviser (ITA) for the HIV/AIDS programme area. The ITA's main function is to give uniformity, support and advice to the projects through site visits and collaboration with relevant external bodies in the programme field. ITA is also actively involved in all activities of the group, described in the working mandate of the group.

The work is organized and coordinated by a Chair and ITA. Group will meet 2-3 times per year and between the meetings the inter and intra-group contact will be based on E-mail. In practical terms activities will be all framed in a logical framework.

HIV/AIDS expert group is underlining that one of the important concepts for ND Partnership is seen in close collaboration, and work with other expert groups created under ND.

The HIV/AIDS expert group of ND partnership facilitates and coordinates a team of professionals in the provision of services to the ND Partnership, which includes: oversight the implementation of

strategic objectives defined by the group and policy evolution in the frame of ND partnership; implementation monitoring, and partnership building.

Mandate of Expert group:

1. Promote the principles and objectives of the ND partnership in the field of HIV/AIDS and develop strong partnerships with a wide variety of stakeholders to ensure that the ND partnership achieves maximum impact. Establish and maintain good relations within the organization and with international and national organizations as well as other institutions as appropriate.
2. Facilitate project proposal preparation process that expedites relevant technical reviews negotiate specific terms and conditions and establish assessment mechanisms, with an emphasis on performance and verifiable results.
In this respect, group can also identify needs and develop initiatives for new projects, identify actors and new partners. All presented proposals will be voted for approval. If the majority of votes will be in favor of a project proposal, it will be approved and recommended for financing. Group itself will not make any direct interference with the issues regarding project financing. Local support for the project is a necessary prerequisite and that projects should be concordant with the national plans for AIDS prevention and control. All projects will be registered and followed-up using ND data base.
3. Contribute to the development of National policies that respond to the needs and requirements of Partnership member countries. Map and identify country needs for technical and financial support to scale up programme and initiate the process of requesting assistance. In association with partners, working group supports efforts to provide technical and other assistance to government and national partners in planning, implementing and monitoring programs to scale up HIV/AIDS treatment, care and prevention. This can include meetings with authorities, visits in participating countries and written information.
4. As appropriate, to represent ND partnership in different forums to promote its objectives and develop support and commitment especially along the lines of generating involvement of a range of external partners.
5. Monitor and evaluate the results of projects and activities implemented under ND initiative, in order to ensure that ND financing is channeled to achieve maximum impact against HIV/AIDS.
6. Provide feedback and report on progress to ND Secretariat.

HIV/AIDS group would like to underline that based on proposal from the group, the newly established Secretariat of ND needs to present an adopted official mandate for the group. That will give opportunities to National representatives in the group, to be more effective in their work within ND activities, in their respective countries.
