<b>Title</b>	Template for structured presentations of needs assessment results
<b>Submitted by</b>	Regional NGO Stellit

Dear colleagues,

During the discussion of needs assessment results we would like to ask you to cover the following issues in your presentations.

### **Focus groups with stakeholders who work with young migrants**

Brief overview of focus group results:

- Brief information about focus group and stakeholders who took part in the focus group (when it was conducted, number of participants, organizations represented etc.);
- Brief feedback on focus group guide – what worked well and what should be improved;
- Brief results of the focus group: what are the migrant youth' needs in HIV and AI prevention programs? Which needs are already covered by existing programs? Which needs are not covered? What kind of prevention work is needed? Which stakeholders could be involved into development and implementation of HIV and AI prevention programs?

### **Focus groups with stakeholders who work with children and young people involved or at high risk or being involved into commercial sexual exploitation**

Brief overview of focus group results:

- Brief information about focus group and stakeholders who took part in the focus group (when it was conducted, number of participants, organizations represented etc.);
- Brief feedback on focus group guide – what worked well and what should be improved;

- Brief results of the focus group: what needs of children and young people involved or at high risk of being involved into commercial sexual exploitation in HIV and AI prevention programs? Which needs are already covered by existing programs? Which needs are not covered? What kind of prevention work is needed? Which stakeholders could be involved into development and implementation of HIV and AI prevention programs?

### **Survey among young people experimenting with drugs**

During the discussion we would like to get from you a feedback on methodology – what worked well and what should be improved in the questionnaire?

### **Best practices in the field of HIV and AI prevention among children and young people at high risk of getting HIV and AI**

Brief overview of best practices:

- Which best practices targeted at children and young people experimenting with drugs, migrant youth, children and young people involved or at high risk of being involved into commercial sexual exploitation are available in our region?
- Which best practices identified in your country could be recommended for further spread in the region?

### **Spreading needs assessment results in a professional community**

Please think about relevant conferences where we could present needs assessment results, peer-reviewed journals where we could publish an article/ articles? Are you interested in the development of an article for a peer-reviewed journal?

### **Development of the training program for stakeholders working with young people experimenting with drugs, migrant youth, children and young people involved or at high risk of being involved into commercial sexual exploitation**

Please think about competences stakeholders should have to work effectively on HIV and AI prevention among migrant youth, children and young people involved or at high risk or being involved into commercial sexual exploitation, children and young people experimenting with drugs.
