Health literacy project

Pia Lindeskog

Maria Lopatina

Current status

- No application for funding for a health literacy planning project was sent to the Swedish Institute, as the NDPHS Secretariat was not currently able to take the main responsibility for the project.
- At the workshop on NDPHS new strategy, it was discussed that health literacy could be a horizontal project within NDPHS, similar to healthy aging. Several other EGs expressed interest in a project on health literacy, especially in organizations – health literate organizations.
