

EG on HIV, TB and AI

-  **Success 2020:** 2-day zoom-conference in December 2020 on Covid-19 implications for HIV and TB services in the Baltic Sea Region: huge support from EG members and wide involvement of external actors and experts; smooth partnership of co-organizers; new contacts established
-  **Ambition for 2021:** to get down to the implementation of WP3 in EU project, and to ensure representation of experts from all ND countries in the EG
-  **Call for action**

WP implementation requires support from NDPHS Secretariat – as the Lead Partner in EU project – in handling the paperwork. Otherwise, the responsibility is on the EG and invited external experts. The EG may decide on organizing a zoomference similar to 2020 event, if funding becomes available. CSR members are helpful in identifying experts to the EG.
