

Occupational safety and health EG

Success story of 2020

- We succeeded in creating an ambitious EU project plan about updating the core competency of OSH professionals in the changing world of work.

Ambition for 2021

- The project will finally officially start after the project coordinator will be nominated in this summer.
- We will finalize gathering the baseline data on education and training of OSH professionals in the member states and organize the first workshop.

Call for action

- We wish that CSR-members from Sweden and Germany will activate their contacts to get representatives from these countries to the project.
- CSR members are encouraged to keep in touch with the national representatives of the EG and the project, because there has been uncertainty about the commitment of the ministerial level.
- We hope that CSR members participate actively in enabling visibility for the project through communication and in the dissemination of the results.
